

# Quickdraw®

CONVEYOR SYSTEMS by MAGSTAR™ TECHNOLOGIES

## Connecting Your Workplace

Quickdraw® designs and manufactures conveyors for factory automation in clean-room environments. A full line of modular components, both standard and custom, are ideal for medical, micro-electronics, and semiconductor applications. Headquartered in Hopkins, Minnesota, the company serves both domestic and international markets.

## MR SERIES

### OPEN CENTER, SLIP-ROLLER DESIGN

Designed for factory automation and robotic assembly, the Quickdraw® **MR Series** features an open center, slip-roller design for accumulation and precise product movement. The MR Series presents a clean, quiet and ESD safe conveyor system. Depending on your system's requirements, it offers adjustable widths, two roller types (standard, and edge handling), two rail options (standard and T-slot), and two drives (direct and belt driven). The conveyor with cleanroom kit shown here includes the optional T-slot fastening rail and the vacuum motor enclosure.
